

Wazo appoints Pascal Crausaz

Pascal Crausaz joins Wazo as Vice President Engineering

Former VP Engineering at Mitel, Pascal previously managed the design of UCaaS collaboration solutions and advanced app development.

Based in California, Pascal will oversee product planning and lifecycle management. He will also provide input into the product and engineering strategy to make Wazo the most powerful and flexible UCaaS platform for telecommunications service providers on the market.

Pascal spent over 10 years at ShoreTel as VP Engineering prior to joining Mitel. He also worked as Head of Business Development at Radvision, leading the transition from conventional videoconferencing to personal multimedia collaboration. Pascal also held senior engineering positions at First Virtual Communication and CUSeeMe Networks, where he managed the development and design of next generation online video collaboration solutions.

Nicolas Marchal, Wazo CEO: *"We are excited to have Pascal join our team, Pascal has extensive experience in our industry and technologies. We are confident that his insights will be key in positioning Wazo as a technology leader and expanding in France and globally."*

About Wazo

Wazo is a leading unified communication solutions provider for telecommunications operators and service providers. Wazo has successfully facilitated its customers' transition to UCaaS (Unified Communication as a Service) with its UC Multitenant platform, which includes voice, video conferencing and instant messaging.

This ready-to-use product allows companies to meet the challenges of mobility, remote work, collaboration and customer relationship management for small and medium-sized businesses. Based on an API-first approach, Wazo can bring communication to the heart of the business process of its partners and end customers. Founded in 2017, the company is currently operating in France, Canada and the United States.
